“Improving the Practice” Questionnaire 2014.....	8

Introduction

This report outlines the compilation and results for the Practice Questionnaire conducted by Fordbridge Medical Centre for early 2014. The questionnaire was completed by 50 patients registered at the Practice who were selected at random.

Aims and Objectives

The aims are to discover what our patients feel the Practice is doing correctly, how to improve it and also to assess the success of the changes implemented in the last year which include the new telephone system. Findings can also be used to discuss at our next PRG and to work on for the next year.

Terms of Reference

This report is conducted for the QOF and DES contract for the NHS. Findings are based on 50 anonymously completed patient questionnaires conducted between January 2014 and February 2014.

The report aims to compile the results of the questionnaire to draw up conclusions as to the successes and the areas of improvement. This report will be published on the Practice website <http://www.fordbridgemedicalcentre.co.uk/>.

Methodology

A questionnaire was compiled within the practice based largely on the MORI questionnaire and on questions the Practice PRG agreed was a priority.

The questions were compiled using simple “yes” or “no” answers and answers graded 1 to 5 (1=poor, 2=fair, 3=good, 4=very good, 5=excellent) to obtain a quantitative outcome. The aim for an average score of 3 was aimed for to indicate whether the Practice was performing to a satisfactory level.

A copy of the questionnaire is included in the appendix.

Patients who filled in the questionnaire were selected at random by those who attended the surgery between January 2014 and February 2014. All questionnaires were

anonymous to enable patients to be more honest in their answers. It was completed by Monday 24th February 2014.

When a random sample is conducted, every item in the population has an equal possibility of being selected.

One advantage of random sampling is that it also decreases the chances of unbiased statistics. This would suggest that as the sample size increases, the statistics from the sample approaches the true values of the population. However this is limited to whether the probability distribution of the population does not vary with time, or as a result of being sampled.

The main disadvantage to random sampling was mainly the time taken to conduct the questionnaires. However, this was not traversable to obtain true and fair results.

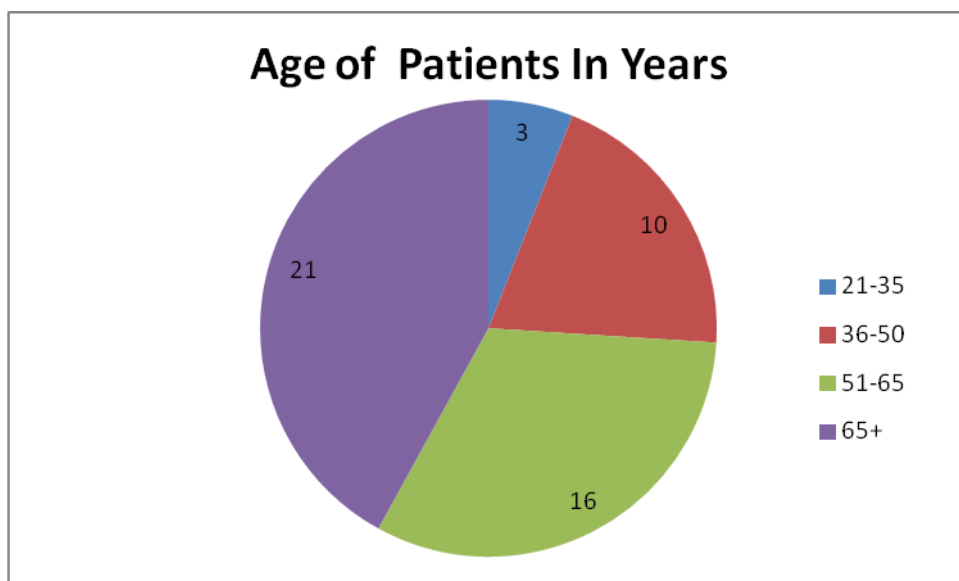

Results

Demographics of those who completed the questionnaire:

- **Female** **28**
- **Male** **22**

Mean average years registered as a patient at the Practice: **21.8 years**

The modal average of patient visits in the past 12 months of the patients questioned was **6 - 10 visits in the past 12 months.**

84% of patients said that they were offered appointments within 2 working days; with 84% booking appointments on our automated system.

The Phone System

Of the 50 patients questioned, 84% had used the phone system which is a rise from the number last year (55%). The reasons for this were not made known. However, 58% of patients said that they would be willing to hold longer to speak to a receptionist rather than book another way. 68% were aware of our extended hours.

The Website

Of those questioned 36% were aware of the practice website. 4% of patients had used it to book their appointments.

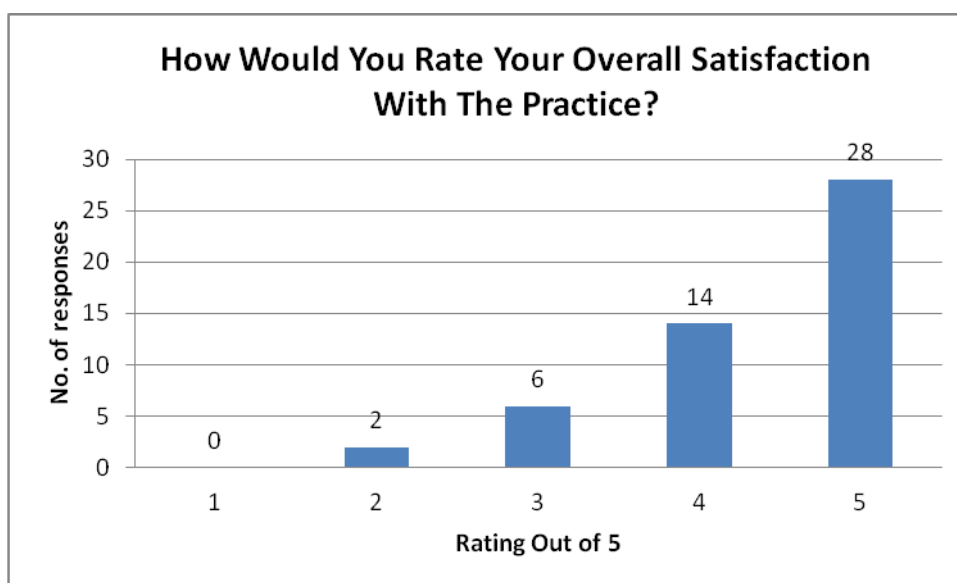

Patients were asked to rate other areas of the Practice on a scale of 1 to 5. 1=Poor, 2=Fair, 3=Good, 4=Very Good, 5=Excellent

Average Scores for other key areas:

	No. of Respondents	Average Mean Score	Score expressed as a Percentage
Satisfaction with opening hours	50	3.9/5	78%
Ease of contacting the Practice on the Phone	50	3.7/5	74%
Convenience of day and time of your appointment	50	3.8/5	76%
Length of time waiting to see the Doctor or Nurse	50	3.8/5	76%
Ease of speaking to a Doctor or Nurse on the telephone	42	3.7/5	74%
Opportunity of obtaining a home visit when necessary	25	3.7/5	74%
Ease of using out of hours service	25	3.6/5	62%
How would you rate the ease of parking at the surgery	46	3/5	60%
How would you rate the ability to access the building?	50	4/5	80%
How satisfied are you of the ease of obtaining test results and medication?	46	4.1/5	82%
Information provided by the Practice about its services	49	4/5	80%

The helpfulness of the reception staff	50	4.1/5	82%
How would you rate the cleanliness of the building?	50	4.1/5	82%
I would rate the Doctor's ability to really listen to me as	50	4.3/5	86%
The Doctor's explanation of tests and treatment	50	4.2/5	84%
The amount of time given to me by the Doctor	50	4.1/5	82%
How you likely to recommend the Surgery to family and friends?	50	4.2/5	84%

The most crucial score was the overall satisfaction of patients:

The average score was **4.36 (%)** which would rate as **“Very Good”**.

The average score for patients being likely to recommend the surgery to friends and family was **4.2(84%)**.

Some patients left further comments which included:

“Front door, no signage (push/pull). No bell if in a wheelchair and need assistance in the surgery.”

“Bad out of hours service told to phone 999”

“Unable to make two appointments at the same time on automated system”

“Perhaps have a surgery email account and send out emails to patients?”

“More emergency appointments slots needed.”

Conclusion

This is a very positive outcome from the Patient survey with the Practice rated as “Very Good” overall.
